Skills

Frontend: Next.js, React, Tailwind CSS, SCSS, ShadCN, Redux, Zustand, Clerk

Languages: JavaScript, TypeScript

Backend & APIs: Node.js, GraphQL, Supabase, Prisma

Payments, Performance & SEO: Razorpay, Core Web Vitals, Lighthouse, SEO

Testing & Tools: Unit Testing, Integration Testing (Jest), Git, Figma, Postman, Firecrawl

Web Engineering: Accessibility (a11y), Internationalization (i18n)

EXPERIENCE

Software Development Engineer - I, Hawk Martech

2024 – Present, Gurgaon

WLPL – Cricket Premier League Platform [\[Link\]](#)

- Built **OTP-based authentication** and secure user registration flow supporting **5,000+ users**, ensuring reliable **session management** and validation safeguards.
- Integrated **Razorpay payment gateway** handling **1,000+ transactions/month**, implementing **order verification**, **affiliate and coupon engine**, and a **15-minute payment lock** reducing **duplicate transactions by 35%**.
- **TLC Admin Panel**, leading frontend development with **2 engineers** to deliver modules enabling marketing teams to **generate manual payment links via SMS/email**, while implementing **coupon management** (creation, expiry control, editing) and **affiliate reward systems** for discount generation.

OneTurf [\[Link\]](#)

- Led development of **live match management system** (commentary, fixtures, stats, scoreboard) and optimized **API polling**, reducing **redundant API calls by 40%** during high-traffic events.
- **OneTurf Admin Panel**, built centralized **content management system** enabling controlled **article publishing workflows** and faster content updates.

Hike Messenger [\[Link\]](#)

- Integrated real-time **audio/video calling using WebRTC** with secure signaling, achieving **sub-300ms peer latency** and stable session handling.

Frontend Engineer, Ingersoll Rand

2023 – 2024, Bengaluru

SEEPEX and Ingersoll Rand [\[Link\]](#)

- Designed and developed **scalable, reusable frontend components** for industrial product listings and **service modules**, improving **UI consistency**, **accessibility compliance**, and cross-page maintainability in collaboration with senior engineers.

PROJECTS

PingPrice – Real-Time Price Monitoring System [\[Link\]](#) [\[GitHub\]](#)

- Designed and built a **full-stack price monitoring platform** implementing **Clerk-based authentication**, configurable **target price alerts**, and **multi-condition tracking logic** (price, stock-state, size filtering) for precise monitoring.
- Implemented **duplicate URL detection**, integrated **automated email notifications (Resend)**, and configured **Supabase database with scheduled cron jobs** for **reliable price tracking and alert delivery**.

Mosh Media – Video Streaming Platform [\[Link\]](#) [\[GitHub\]](#)

- Developed a **responsive video streaming platform** using **modular React components** with **performance-optimized media rendering**, ensuring scalable UI architecture and smooth playback.

EDUCATION

Harcourt Butler Technical University

2020–2022

Master of Computer Applications (MCA)
