Profile Summary

Software Engineer with 3+ years of experience building highly **scalable web applications** using **React, Next.js, and TypeScript**. Experienced in owning **frontend development end-to-end**, building production platforms and delivering **complex workflows, API integrations, and payment systems**. Skilled in **optimizing performance** and building reliable user experiences, including platforms supporting **5,000+ users** and **1,000+ monthly transactions**. Passionate about **web architecture** and mentoring engineers while building **resilient, maintainable, and modern web applications**.

Technical Skills

Languages: JavaScript, TypeScript

Frontend Development: React, Next.js, Tailwind CSS, SCSS, ShadCN, React Flow

State Management & Data: Redux, Zustand, TanStack Query, TanStack Table

Backend & APIs: Node.js, REST APIs, GraphQL, Supabase, Prisma

Testing & Quality: Playwright, axe-core, Vitest, Jest, Unit Testing, Integration Testing

Web Engineering & Tools: Web Accessibility (a11y), Internationalization (i18n), Core Web Vitals, SEO, Lighthouse, Razorpay, Git, Postman, Figma

AI & Emerging Tech: LLMs, Generative AI (GenAI), Gemini API, Vector Databases, Firecrawl

DevOps & Automation: Docker, GitHub Actions, CI/CD

Experience

Software Development Engineer – II, Hawk MarTech

2026– Present

HikeBridge – Customer Engagement Platform [\[Link\]](#)

Gurgaon, India

- Built the **HikeBridge customer dashboard from scratch** as the **sole frontend developer**, delivering **49 routes** and **191 reusable components** across a **multi-tenant SaaS platform**.
- Designed and implemented **end-to-end frontend workflows** for **omnichannel messaging**, contact management, **WhatsApp template management**, service onboarding, audience segmentation, and **billing**.
- Engineered a **visual workflow automation builder** using **React Flow** and **ELK**, supporting node-based **triggers, actions, conditions, waits, versioning**, and **automatic layout** across complex customer journeys.
- Integrated frontend workflows with **multiple backend services** for wallet management, **Razorpay payments**, **usage-based billing**, plans, proration, tax invoices, **GST**, **UPI Autopay**, and **eNACH**.

Software Development Engineer – I, Hawk MarTech

2024 – 2026

WLPL – Cricket Premier League Platform [\[Link\]](#)

- Built **OTP-based authentication** and secure user registration flow supporting **5,000+ users**, ensuring reliable **session management** and validation safeguards.
- Integrated **Razorpay payment gateway** handling **1,000+ transactions/month**, implementing **order verification**, **affiliate and coupon engine**, and a **15-minute payment lock** reducing **duplicate transactions by 35%**.
- TLC Admin Panel**, leading **frontend development with 2 engineers** to deliver modules enabling marketing teams to **generate manual payment links via SMS/email**, while implementing **coupon management** (creation, expiry control, editing) and **affiliate reward systems** for discount generation.

OneTurf – Live Sports Platform [\[Link\]](#)

- Led development of live **match management system** (commentary, fixtures, stats, scoreboard) and optimized **API polling**, reducing redundant API calls by **40%** during high-traffic events.

Frontend Engineer, Ingersoll Rand

2023 – 2024

SEEPEx and Ingersoll Rand [\[Link\]](#)

Bengaluru, India

- Developed **reusable and scalable frontend components** for **industrial product listings** and **service modules**, improving **UI consistency, accessibility, and maintainability** across multiple pages. Collaborated with **senior engineers** to build **responsive interfaces** and deliver maintainable frontend solutions aligned with project requirements.

PROJECTS

FixMyTree – Website Accessibility Scanner [\[Live\]](#) [\[GitHub\]](#)

- Designed and built an **AI-powered accessibility platform** using **Next.js, React, Playwright, axe-core, Supabase, and Gemini**, scanning websites in a real browser for **WCAG 2.1 A/AA violations**.
- Engineered **severity-based accessibility scoring, issue triage, and scan history**, enabling developers to identify and prioritize accessibility issues across scanned pages.
- Integrated **Gemini-powered remediation suggestions** with structured responses, caching, retry handling, **Supabase Row Level Security**, and **GitHub Actions CI** for reliable multi-user operation.

PricePing – Real-Time Price Monitoring Platform [\[Live\]](#) [\[GitHub\]](#)

- Designed and built a **full-stack price monitoring platform** using **Next.js, React, Supabase, Firecrawl, and Resend**, enabling users to track e-commerce products through a single URL.
- Implemented **automated product extraction and scheduled price monitoring** with target-price, stock, size, and tolerance-based alert logic.
- Built **price history tracking, variant-aware monitoring, filtering, and automated email alerts**, with user-level data isolation and **GitHub Actions CI** for reliable production workflows.

EDUCATION

Harcourt Butler Technical University
Master of Computer Applications (MCA)

2020 – 2022

LANGUAGES

Languages: English (Professional), Hindi (Native), Dutch (A1)
